The Vall d'Hebron department of urology and renal transplantation organize one day training courses specifically focused in some surgical techniques in which the staff have a great experience.

The urology department is organized in areas of knowledge where their leaders develop surgical star techniques and research projects.

One day immersed in:

Robotic radical prostatectomy

Robotic partial nephrectomy

Robotic cystectomy and

intracorporeal bladder reconstruction

Holmium laser enucleation

Flexible ureteroscopy

Prostatic fusion biopsy
